- Front End Development
- HTML5, CSS3, Javascript, React, ES6, Scss

SKILLS

Expert:

HTML5, CSS3, Javascript, ES6, React

Intermediate:

NodeJs, Mongo DB, Express, Scss

Tools & Technology:

Git, Chrome Dev Tool, VS Code

Heroku, Firebase, Bootstrap, Material Ui

PROJECTS

Transporting System Development

15 April 2021- 20 April 2021

- We have 3 service systems. Please select one or more systems for transporting your things.
- An authenticated user can use transporting service.
- Website authenticates by firebase.
- There are separate dashboards for admin and user. The user will be able to view his order list and give reviews.
- Admin can add new service, new admin, new product, and delete again..

E-Commerce Development

4 April 2021 - 7 April 2021

- Developed using firebase's login system.

- There is no separate dashboard for users and admin.
- You can view your ordered products on the dashboard.
- If the user is logged in, he can place the order, otherwise, he can only see the product
